

Dear Liza

I hope that you had a lovely weekend away after your very tedious and very exhausting four Days of hand work; I wish that you were here to reap the benefits of your marvellous work. You truly gave us a facelift and a garden to be proud of; we had an article on one of the Local newspapers about the whole project. Our weekend routine has totally changed since the inception of the garden, kids no longer get bored and gamble but have something to look forward to. The garden has brought back their childhood and caregivers do not have to run around looking for them. The atmosphere has completely changed seeing the whole space as a beacon of hope, the chance to dream again and a new leaf for new beginnings.

I think from the whole organisation point of view, most people were demotivated and i think the change in the garden has created a chance for people to change and be that change they want to see in the organisation. Your handwork and perseverance throughout the four days truly inspired us to realize that everything is achievable if you keep your eyes on the prize, you have shown us that focusing our energy on one thing persistently has its rewards. I regard this garden as a sanctuary and from time to time I just go outside to intercede for the organisation to flourish just as this garden has over the few months. This is a miraculous garden that has sustained itself by bringing rain and we also have been given extra room for counselling.

To Dave and Team well done and thank you, May God give you extra hands to help those in need and bringing hope.

Regards,

Carol Dyantyi
